

Video Surveillance and Access Control Design & Installation

## Commercial

### **Oliver Communications has a solution for your commercial building!**

With systems using advanced technology in Access Control and Video Surveillance, Oliver will design a system that will allow you control everything from one client station. Access Control, ID badges, security level authorizations, one click on a map of you facility can open or close any door, lockdown the entire building, direct a camera to an incident, send reports to upper level management or security personnel. The systems will allow you to incorporate building automation functions such as, turn on lights when a door opens, turn on HVAC, or even start the coffee maker in the kitchen.

**Security Cameras:** Oliver carries a full line of analog and IP cameras and lenses for your different surveillance needs. We also carry specialty cameras, such as infrared, low-light and night vision cameras.

**Digital Recorders:** Oliver has a full portfolio of recording products, from DVR's and NVR's to Hybrid

**Video Management Software:** Full IP servers w/ various Video Management Software packages to choose from.

**Video Analytics:** Oliver has cameras "smart cameras" and software to perform video analytics such as crowd gathering, package left behind, traffic in the wrong direction, etc.

**Monitors:** Choose from a full line of monitor types, sizes, resolutions and formats including LCD, flat panel and touch-screens.

**Remote Viewing:** Select from a number of methods for remote viewing, from IP-based cameras to web-based browser software.

**IP Networked systems:** Oliver has systems that will allow you to use your existing IT infrastructure for your video surveillance network

#### **Access Control Solutions**

Oliver has the most advanced access control systems on the market today. Card or keypad, biometric readers for highly secure areas. Badges that allow access to areas based on security access levels

**Complete infrastructure:** Oliver Communications has been a telecommunications and electrical contractor for 18 years, and has a full product portfolio that can deliver in any situation:

- **Cabling Infrastructure**  
(Underground or Aerial, New poles, Manholes and hand holes)
- **Fiber and copper backbones, Inside station wiring**
- **Wireless communications**  
(WLAN's, Mesh, PTP, PTMP, Mobile),
