Municipalities / Public Safety

When it comes to public safety, Oliver Communications puts your concerns first in the design process. Oliver will listen to your issues and look at your areas of concern, then their in house security team along with their strategic partners will develop a design that meets your concerns and your budget.

Oliver Communications is a Genetec Partner and Authorized Dealer. With Genetec's Omnicast, Synergis and AutoVu Unified software platform, combined with high end cameras like Axis, Panasonic, Bosch or Arecont, installed and transmitted with a wireless solution From Firetide or Proxim, or a fiber backhaul link, you will get the best City Wide Surveillance solution on the market today !

Genetec overview:

Omnicast™, an integral part of the Genetec Security Center, provides seamless management of digital video, audio and data across any IP network. With an array of features described as some of the most innovative, Omnicast has proven to be the system of choice in numerous industries including Municipalities, Transportation, Education, Retail and Gaming. End users have the flexibility of installing Omnicast as a standalone video system or activating it within the Security Center and taking advantage of Genetec's next-generation client application for monitoring their video cameras, the Security Desk.

Synergis™, an integral part of the Security Center, is designed with end-to-end IP connectivity, from access control reader to client workstation. As one of the most intuitive IP access control solutions on the market, Synergis is being used by a number of organizations within the Municipalities, Transportation, Education, Retail and Gaming industries

AutoVu reads license plates of vehicles moving at differential speeds up to 140 MPH (225km/h). With an extensive field of view, AutoVu will give you the ability to read license plates spanning two lanes of traffic. As an advanced LPR solution, AutoVu allows law enforcement agencies to automatically read license plates from both moving and parked vehicles and match each plate to an on-board database of wanted vehicles. Genetec's AutoVu solution automates the identification and tracking of wanted vehicles so that your law enforcement officers are not diverted by a sophisticated technology, but can concentrate on their main objective, serving and protecting communities.
